mió.

Yo me aproximaba ellas se retiraban. Cada 400 ó 500 metros ptra vez se ponía firme. Estabdo a unos 200 metros de allá, por la calle, se me aparecieron cuatro seres humanos, ó lo que sean siguiendo la misma dirección que yo. Yo les hablaba, haciendole toda clases de preguntas y propuestas, pero nadie respondió. Uno de ello se iba aproximando demasiado en los 50 ó 60 metros que marchaban al lado mió.

Entonces al notar que el que se me aproximaba tenía algo así como un triángulo en la mano, tuve miedo que me lo pusiera en la cabeza y le disparé un tiro. Pero..., solo note como si una sombra hubiese caído para atrás.- Los otros siguieron unos pasos más y se volvieron. Tenían una altura de unos 2 metros como mínimo y una especie de coraza de yeso. Su vestidura al ser alumbrada por el vehículo iluminada a su alrededor como chispitas.-

Nuevamente tuve la luz encima otra vez. Yo me cubría como siempre la cara con la manta hecha un bulto y así estuvimos los dos parados a unos 5 metros de distancia, cerca de un minuto. En ese momento se apago y vi pasar ptra vez el vehículo grande, pero con los dos faroles rojos prendidos y sin luz en las ventanillas.-

Así pude llegar al pueblo de Monte Maiz (Cba.), enfocado de vez en cuando por las luces y principalmente por la azul que no me dejo hasta llegar al mismo. Sí bien no me enfrentó en ningún momento, parece que desde "arriba" dirigian todo lo demás. Luego llegue al pueblo y pregunte a una persona donde estaba la comisaria, ya que yo no lo conocia.-

Of our greatest consideration:

It is a great pleasure to direct ourselves to you with the aim of collaborating in clearing up the mystery that surrounds non-identified flying objects, which science we call "Kosphaerlogia" which literally means "the study of Foreign Air Phenomenons", we dedicate with eagerness, sending you for your study the following/ attached pamphlet .--

It concerns an event which was registered in 1963, in which several factors instigated an exhaustive investigation on the part of C.E.M., to analyze the corresponding details of the above mentioned.-

We would appreciate it if your department could send us some recent, important cases and also authorized photographs for our file.-

We would also appreciate your opinion of the "flying saucers" and especially in this case which we send you.

Awaiting your reply, we are pleased to cordially greet you,

P.S. We also express our sorrow and grief for the treacherous death of the great american, who in life was President of your appreciated country, Mr. John F. Kennedy.

Douglas Case - 1963

Testimony of the truck driver, [REDACTED] who lives in the city of Venado Tuerto, Chile Street corner of Los Andes, Province of Santa Fe; Republic of Argentina. This person was sent to C.E.M.

" To be known, in order to be brief; I, on the 11 of Oct. 1963, took the cross-roads from Chabón towards Cavanag, where I was to unload the carbon I carried in my 1936 Ford, having to pass many little "pueblos" to get to the latter. I noticed it was sprinkling and that it was getting dark, what with the truck in bad condition I decided to spend the night in Wenceslao Escalante . (Cba.)

But not finding a room in any hotel I undertook the trip once more flooring the accelerator in order to arrive at Cavanag. After crossing through Monte Maiz with only about 7 kilometers to Isla Verde I saw small red lights. Thinking that it was a stopped/parked vehicle I switched my lights on and off, but I did not get any answer. Advancing about 15 to 20 meters, which I cannot swear to be correct, the above mentioned lights gave out a flash, cutting off my current completely, for which reason my motor stopped dead.

I cannot give the precise time that transpired after I got over the initial shock, I got out of the car, right side, observing what looked like a car but I did not see anything. I then tried to start my truck and tried the lights, but neither worked. I tried to find the trouble produced by the shock and noticed that the front axle was twisted and it was impossible to continue the trip. If it had only been the lights and the fuses there wouldn't have been too much of a problem for me. At this time I took out a blanket and my .38 caliber shot out of its holster.

I waited to see if a car would come in any direction that would take me to the nearest town. It was at this time that I noticed a glare coming from the direction

of Isla Verde that looked like an approaching car on the street that ran parallel to the one where I stood and was separated from my street by railroad tracks.

I was going to shout, thinking it was a farmer who had an entrance there, but at about 40 or 50 meters I observed two people walking illuminated by the lights of the vehicle, their clothes as ^{well as} the lights of the vehicle made me a bit suspicious. I note here that up to this moment I had not felt the slightest bit of fear, but the shock was so great when the vehicle turned off its lights and I couldn't see the vehicle nor the people that I became frightened, all at once I saw a light that was very near me and was coming towards me. The light was red. It didn't glare but gave off these very fine rays of ^{powerful} light. There was a certain smell of gas that made my face and eyes sting. On the other hand it made a small sound which I couldn't find similar to anything. The light came upon me, I surrendered and spoke to it as I ¹walked away from it backwards to the side of the trunk of the truck. My knees gave way. Fear had overtaken me. I asked God to help me and when it was at more or less a meter away from me I took my revolver out of its holster and fired a shot at the light. It made a sound as if steel has been rubbed against a piece of emery. The "light" gave out a sound, like the rapid braking of a car and went backwards a few meters. It took a blue light appearance and took off in at a high rate of speed forward, illuminating upward. I fired another shot at the crossroads and went into the field looking for shelter in the top of a small hill that I had previously noticed when I had first stopped the truck.--

When I had calculated that I was near the hill I shouted "Farmer" the hill as I was later able to prove that the hill was only a small cluster of trees.....

From the hill two red lights appeared, that were more like mirrors than lights because they didn't illuminate rather they traced and reflected my steps. Then in my desperation I sought Isla Verde but the blue light which I had seen previously

illuminated me once more. I wasn't able, due to my excited state to observe the fact that the light came from above or below.

I turned and started walking in the opposite direction, by this time confusing fear had its grasp on me and I started walking towards the open field when I cut my hand on a piece of wire. I crossed through a plowed field then through a sowed field. I was very tired. All of a sudden I noticed a red light in front of me and when I moved it moved with me. I decided to move towards it. It stopped in one place and didn't move any more. It looked like a mirror as it wasn't illuminated but reflected my steps. When I was about 10 meters away it turned off and became dark.

On the right side of me at about rib level a vineyard shaped vehicle was giving off a blue light. It started up one or more motors, that made sounds similar to those of a diesel/^{train}engine. It was approximately 8 meters in diameter and 3 meters high. I noticed two small windows out of which blue light was coming. They were 60 to 80 centimeters high and long and they were about 1 or more meters separated. I saw someone move inside, but I didn't see legs, or faces, just a body type form. I thought that they had left for good, as it moved and disappeared.

I looked around trying to orientate myself, walking towards the highway in order to arrive at a town always looking around and searching all directions, but those little lights never left me. They appeared to be inter-exchanging signals and the red light was once more in front of me. I approached and they retraced. Every 400 or 500 meters it would stop. About 200 meters from the object on the street 4 human beings or whatever they were appeared walking in the same direction as I, I spoke to them, asking them all kinds of questions and propositions, but nobody answered. One of them came up very close to me in the 50 or 60 meters they walked beside me.

Noticing that he came closer I noticed triangular object in his hand, I was afraid he would place it on my head and I fired a shot. But all I noticed was as if a shadow had fallen backwards. The others kept on for a

few more paces then they turned around and returned. They were about 2 meters tall as a medium, and some sort of plaster type armor. Their uniform when it was illuminated by the vehicles lights seemed to give off sparks.

Once more I had the light on top of me. I covered my face once again with the rolled up blanket and in this mannner we were face to face at a distance of about 5 meters for almost a minute. In that moment the small object darkened and I saw the large vehicle pass overhead with the two red beams on and no lights in the windows.

In this manner I was able to get to the city of Monte Maiz enfocused from time to time by the lights and especially by the blue light that didn't leave me until I had reached the city. It didn't glare at me face to face at any time, it seemed to come from above. When I arrived at the city I asked the first person I met where the police station was since I didn't know.

Additional Questions:

Question: Did they have anything on their heads?

Answer: Yes, like a helmet and it was shiny in the light.

Question: How many windows did the objects have?

Answer: I only saw windows in the big object. It had two about 70 centimeters.

Question: What were the human beings like?

Answer: The same as us. They moved their arms like we do.

Question: Where did the rays and the red lights burn you?

Answer: On the cheeks. They made my eyes sting. My sight was a little cloudy for 3 or 4 days then I got over it.

Question: Did you notice anything strange in those humans?

Answer: That they were all more or less the same stature. And they never spoke. And they wore a different dress than ours.

Question: What color were the objects?

Answer: The first one was white. The second one which was bigger was wood color.

the episodes about which he had some certainty . When he explained that the beings didn't seem to support themselves by leaning towards the ground he didn't invent anything to justify this.

Question: Was there any time that he was confused?

Answer: There was a period about 2 or 3 hours from midnight till he arrived at the police station that he was confused. He explained that the red lights (the intensity of) confused him extraordinarily. He didn't know where he was or what he was doing.

Police Report :

The following day it was proved that the truck was at the indicated place [REDACTED] spoke of and his footprints through the field were found .

Dear [REDACTED] and [REDACTED]:

This is in reply to your letter of January 15, 1964, in which you were kind enough to send the Air Force the report of a sighting of an Unidentified Flying Object by Sr. [REDACTED] Argentina.

While this report has been of great interest to the Air Force, it is believed not feasible to initiate an investigation due to the length of time that has passed since [REDACTED] witnessed this sighting, and also because of the expense involved in conducting a field investigation.

In order to make an evaluation of a report such as this one, it would be necessary to have scientific data such as description or size of object, shape or color, direction and elevation, exact time and location, and, of particular value, any corroborating information from an additional witness or witnesses. Previous investigations by the Air Force of cases similar to this one have never resulted in any scientific or physical proof that contact had actually been made with beings from outer space.

Inclosed is a brochure which lists several of the 1963 reports which were investigated by the Air Force. There are no photographs available for release on this subject.

We appreciate your sending this case to the Air Force, and it will be carried in the Air Force files with an evaluation of "Insufficient Data."

Sincerely,

MASTON M. JACKS

1. Reference the attached letter from [redacted] and [redacted]. The following information is provided to assist you in a reply to them regarding an alleged sighting of a saucer by a [redacted] and his contacts with its inhabitants.
2. The sighting has been reported to us indirectly and therefore the information presented is, at best, second hand. We do not feel that this case should be investigated due to the delay in receipt of the report and the expense involved in conducting a field investigation. However, the case will be carried in the Air Force files with an evaluation of "Insufficient Data" due to probable distortion of basic facts in the case.
3. It is not our desire or intent to offend or ridicule [redacted] and [redacted] sincere report of [redacted] sighting. In your reply please express our appreciation for their forwarding of the report.
4. Our opinion, not for release, is that this case follows a pattern of previous cases of alleged contacts with assumed beings from outer space. All such reports have failed to produce any evidence of their actual occurrence. The general tone of [redacted] story indicates a possible hallucination since he apparently is convinced that the occurrence was real and no evidence of a hoax is presented. However, psychiatric examination would be necessary to confirm or refute this theory. Also it is possible that [redacted] received a blow on his head when the axle of his car became bent and temporarily placed him in a dazed condition.

gentina, [REDACTED] LANDING IN ARGENTINA: From our special correspondent in Argentina, [REDACTED], we learn that landings of flying saucers are still occurring frequently in that country. (See the December 1962 and March 1963 issues of SAUCER NEWS for earlier landing reports.)

The latest case involves truck driver [REDACTED] who, on October 19th, told police the following story, which we have translated from Spanish:

"I was driving my truck to Isla Verde when a luminous object - apparently a spaceship - surrounded by a light of blinding brilliance, came down near me. Three very tall beings, dressed in strange clothes and carrying some unknown kind of weapons, came down out of it toward me. I lost control of my vehicle and drove into a ditch, but I finally got back onto the road and kept on driving at high speed. The three beings kept coming after me. A blinding red light came from their craft. The creatures followed me for about a mile and a half, and shot out a gas which burned and caused me to lose my vision temporarily. When I finally arrived in the outskirts of the town of Monte Maiz, they suddenly stopped the persecution. They then got back into their craft, which disappeared into the distance."

The article goes on to state that [REDACTED] had indeed been burned by something, and that the doctors who examined him were not able to find the cause of the burns!

"CASO DOUGLAS" - AÑO 1963

Relato del camionero, [REDACTED], domiciliado en la ciudad de Venado Tuerto, (en calle Chile esquina Los Andes), Provincia de Santa Fe; República Argentina, que fuera remitido al C.E.M.-

-----+-----

" A saber, para ser más breve; Yo el día 11 de Octubre del Cte. año a las 20 hs., tome el cruce desde la localidad de Chabón (Pcia. Córdoba) hacia Cavanag (Cba.) donde tenía que descargar el carbón que traía, (en mi camión Ford - 1936) teniendo varios pueblos por medio antes de llegar a esta última localidad mencionada. Y fue así que al ver que lloviznaba, los caminos estaban malos, y la noche se aproximaba decidí quedarme en Wenceslao Escalante (Cba.).-

Pero al no encontrar cama en el único hotel que hay ahí, reanudé la marcha apretando el acelerador, a fin de poder llegar a Cavanag. Luego de cruzar la población de Monte Maíz (Cba.) y faltandome unos 7 kilómetros para en Isla Verde (Cba.) donde el camino se encontraba en muy mal estado, divisé dos pequeñas luces rojas. Y creyendo que era un coche que estaba parado le hice señas con las luces, pero nadie respondió. Al aproximarme a unos 15 ó 20 metros, cose que no puedo asegurar, dichas luces hicieron así como un fogonazo, cortandome la corriente por completo, por lo cual se paró el motor.-

Mientras que los fusibles de las luces se quemaron, yo sentí como un tirón en todo el cuerpo, por lo que me ví obligado a abandonar el volante. Yendo a chocar el camión contra la banquina del lado derecho.-

Después que reaccione, no puedo precisar los segundos transcurridos, me baje por la puerta opuesta en que llevaba al volante, observando lo que creí era un automóvil, pero no ví más nada. Entonces probé el arranque de mi camión y las luces, pero nada de eso andaba. Trate de verificar el desperfecto producido por el cheque. Note que tenía el eje delantero torcido, por lo que me era imposible seguir viaje. Si solo se hubiese tratado de la corriente y los fusibles no sería problema para mí. Y fue en ese momento que preparé la manta y saque el revolver, calibre 38 corto de la guantera.

Quede pues esperando que viniese algún coche de un lado u otro para que me condujese a un pueblo. Fue en esos instantes cuando observe que al lado de Isla Verde (Cba.) ví un destlumbré como si fuese un auto que venía pero de la otra calle que corre paralela a la que andaba yo, dividida por las vías del ferrocarril.-

Iba a gritar, creyendo que era un colono que tendría una entrada ahí pero... observe que a unos 40 ó 50 metros iban dos personas caminando, albrados por la luz de ese vehículo, cuyas vestimentas así como las luces de ese "coche" se hicieron entrar en sospechas.-

Hago notar que hasta el momento no había sentido en mí, ni el más mínimo recelo, pero fue tal la sorpresa cuando las luces del vehículo se apagaron y no ví más ni al mismo ni a los que caminaban, que me entro un poco de temor.- De pronto ví una luz muy cerca mío que se dirigía hacia donde estaba yo. Esta luz era roja. No alumbraba, pero daba unos rayos finísimos muy potentes. Había un olor a gas que me hacía arder los ojos y la cara. Aparte que hacía un ruido pequeño, que no se a que asemejarlo. Esta luz se me venía encima, yo me persigne, le hablaba mientras retrocedía para el lado de la parte trasera del camión. Ya las rodillas se me doblaban. El miedo se había apoderado de mí. Pedía a Dios que me ayude y cuando estaba más ó menos a un metro de distancia, no se de donde saque fuerzas, tome el revolver de la cintura y le dispare un tiro. Este hizo algo así como si hubiesen arrimado un hierro a una piedra cemenil. La "luz" emitió un ruido, como el de una frenada y se fue para atrás unos metros. Pendió una luz azul y salió a gran velocidad hacia adelante, alumbrando hacia arriba. Yo le disparé otro tiro al cruce y gane el campo buscando refugio en un monte que había alcanzado a divisar cuando recién me había quedado parado con el camión.-

Cuando calcule que estaba cerca del monte, grite; "Colono".... y este monte según pude luego comprobar yo al otro día, eran unos árboles solos.-

De ahí aparecieron dos luces rojas, que más bien parecían espejos porque no alumbraban, sino que marcaban mis pasos. Entonces en mi desesperación busque para Isla Verde, pero la luz azul que antes había visto me volvió a iluminar. No pude apreciar, tal vez por la excitación, si provenía de abajo ó de arriba.-

Por lo que me di vuelta en sentido contrario, ya medio desorientado y me encamine por el campo, donde me lástine una vana, debido a un alambre que me lleve por delante. Cruce un terreno arado y luego a uno sembrado. Yo me encontraba bastante agotado. De imprevisto ví que había una luz roja adelante. Para el lado que me movía este lo hacia igual.-

Decidi seguir hacia ella. Esta se plantó en un lugar y no se movió más. Parecía como un espejo que no alumbraba, sino que marcaba mis pisadas. Cuando ya faltaban unos 10 metros para llegar a ella se apagó.

A unos 10 metros, pero a un costado mío se prendió una luz azul, de un vehículo en forma de bordaleza de vino. Este puso en marcha uno ó más motores, que hacían un ruido como el de las máquinas diesel del ferrocarril. Tenía unos 8 metros de diámetro por unos 3 de alto. Observe dos ventanillas por las cuales salía una luz azul. Estas tenían de 60 a 80 cms. de alto y largo y estaban separadas entre sí a un metro más ó menos. Ví que alguien se movía adentro, pero no vi piernas, ni cara, sino la caja de un cuerpo. Luego que esto yo me había ido, ya que pareció moverse y en segundos ni entres de él.-

Busque orientarme, caminando hacia la vía, pero al llegar al punto siempre observado por todos lados, pero... esos espejos nunca se despegaban de mí. Parecían hacer señas y la luz colorada otro vez delant
